Rahmenthema: US Politics and society in the Age of Trump

Begründung und Zielsetzung des Seminars:

US Politics have a direct influence on Germany and the rest of the world. In the past, the American Presidents were always named the “leaders of the free world”. However, what started with a very conservative, right-wing movement in the US culminated in the election of President Trump. Many fundamentals of Western democracies have since been shattered and not many people in Europe would consider Trump a leader of any democratic values at all. The non-response after the killing of George Floyd is just one of many examples.

In this seminar you will therefore take a closer look at US political and social issues. You should be willing to read and write English texts if you want to attend.
